DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appear below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Regarding claim 39, line 12, please delete "the outbound packet;" and insert ---the outbound packet.---

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 33-38 and 43, prior arts do not disclose a method for VLAN packet classification, comprising a combination of:
determining the classification mode type:

if the determination is made that the classification mode type is a first classification mode, determining if the VLAN m is valid and if the VLAN ID is valid, transmitting the packet to a switching controller, and
classifying the packet to a VLAN associated with the VLAN with the port;

if the determination is made that the classification mode type is a second classification mode, transmitting the packet to the switching controller, receiving a VLAN ID associated with the port, classifying the packet to a VLAN associated with the VLAN ID associated with the port;
and

if the determination is made that the classification mode type is a third classification mode, retrieving a protocol type associated with the packet, and determining if the protocol type is supported, and if the determination is made that the protocol type is supported transmitting the packet to the switching controller, classifying the packet to a VLAN based on the protocol VLAN ID.

Regarding claims 39-42, the prior arts do not disclose a method for VLAN packet classification, comprising a combination of:
determining the tagging mode type:

if the determination is made that the tagging mode type is a first tagging mode type, retaining the VLAN ID as received in the packet;

if the determination is made that the tagging mode type is a second tagging mode type, retrieving the VLAN ID from the outbound packet, replacing VLAN ID in the outbound packet with a VLAN m to which the packet is classified; and

if the determination is made that the mode type is a third tagging mode type, retrieving and removing the VLAN ID from the outbound packet.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2661

(1) US Patent 6,181,699 (Crinion et al) discloses an apparatus for and method of assigning a VLAN tag to a frame received at a port of a switch.
